All team members contributed equally to Iteration 1 in terms of development effort, meeting participation, planning, and documentation.

Each member was assigned a major user story and was responsible for implementing its UI components, logic, and related testing. All members actively participated in discussions, Git commits, Jira tracking, and collaborative decision-making.

Saneea Khalid
Implemented the Medication Tracker page, including medication toggle functionality, visual feedback, and integration tests. Contributed to project planning, documentation, and testing setup.

Adeena Ahmed
Implemented the Login page, including navigation logic and input validation structure. Contributed to UI consistency project planning and testing.

Jose Urbina
Implemented the Task Management page, including task creation, completion toggling, and local storage handling. Contributed to project planning, documentation, and integration testing.

Tara Mivehchi
Implemented the Notes/Communication page to support shift handoff functionality. Assisted with project planning, UI structure and collaborative refinement.

Neharika Sharma
Implemented the Dashboard page and contributed to the layout structure and navigation flow. Conducted the customer interview and documented key findings for Iteration 0 validation.

All members:

- Attended team meetings
- Contributed meaningful commits to the Git repository
- Participated in Jira task tracking
- Completed assigned development tasks
- Collaborated on documentation and testing
-

There were no concerns regarding unequal workload or participation during Iteration 1.
